Historian Story:

Shrieks, Shreks, and Squeaks

As October comes to an end, we have a tradition of watching horror movies for a full week. That's right, one full week of only the spookiest, scariest, hardest to see what's on the screen movies. After we're done with screaming until our vocal chords give out, we like to cool down with some good laughs as we watch Shrek movies for a week. There has been a recent push for yet another week of cooling down from the horrors with a new week called squeak week, where we watch movies starring cute animals or little guys to lighten the mood.
