Historian Story:

SBU vs the Commuters

This story is a new one, for only a year ago SBU MAPS (mobility and parking services) revealed their plans to make increase parking revenue on campus. All parking (except potentially South P) was to become paid with a new commuter premium rank. Their plan was expected to increase their revenue by a petty sum of 2 billion dollars (or something around that). The Forum, being a largely commuter club, obviously did not like this. So we closed the Forum and went to protest, and left this sign on the door.
